Solution

Personal & Staff Storage

Location

Brussels, Belgium

**10,000**

Employees requiring  
locker access  
permissions

**22**

Offices where the  
lockers were installed

**5,000**

Number of Smart Locker  
Walls installed

## Optimizing Workplace Flexibility for the Flemish Government

The Flemish Government (Vlaanderen), a major public institution, embarked on a significant renovation project to convert their traditional office space, which housed 2,400 fixed workplaces, into a modern and flexible work environment. They needed a smart and flexible storage system that could seamlessly integrate with the new hybrid work model, replacing the outdated system of fixed desks and filing cabinets.

# Flemish Government's Challenges

## Outdated Storage System

The previous system of fixed desks and filing cabinets was inefficient and ill-suited for a modern, flexible workplace.

## Inefficient Management

Manual management of the storage system was time-consuming and detracted from staff's core responsibilities.

## A Big Push to Modern Tools

The project needed a storage solution that could support a modern and flexible work model for 2,400 workplaces.

## Sustainability Requirements

The client required a solution that met strict sustainability criteria, including using recycled panels and local production.

## A Smarter Solution

### Partnerships & Discovery

Keynius collaborated with its partner, Olssen, to provide a comprehensive, modern smart locker solution designed to meet the government's specific needs.

### Solution & Recommendation

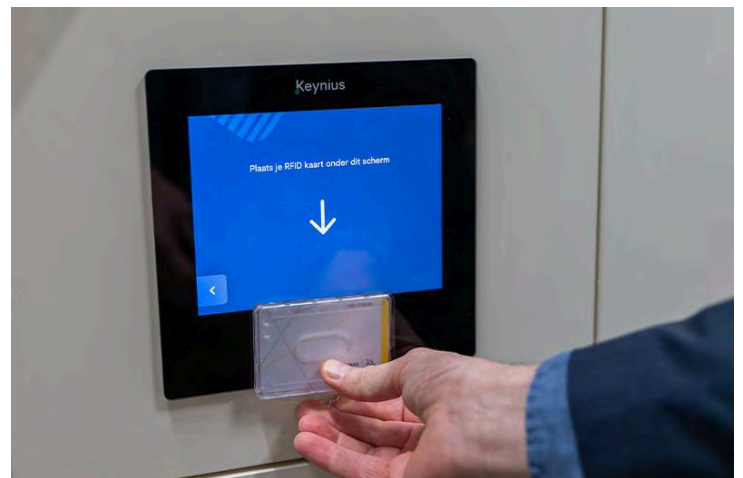

Keynius proposed a smart locker system to facilitate the shift from traditional fixed desks to flexible workspaces.

### Customization & Collaboration

The solution included custom upholstered seats placed between the locker walls, and private MAC security additions.

### Why Keynius

The government selected Keynius for its all-in-one application capabilities, connected solution, and its commitment to using sustainable materials and local support.

“Thank you  
for the great  
collaboration!”

Tom Van Haver

Senior Project Manager at Vlaanderen

# The Results: Enhanced Efficiency and Improved Access

## Support Hybrid Work

Staff can claim 1 of 5,000 lockers across 22 office spaces for the day with their badge.

## Use & Accessibility

Departments have dedicated group lockers and are designed for easy wheelchair access.

## Custom Integration

180 custom-made locker walls were installed, with integrated shelving units and seating areas.

## Easy Operation

Staff use their building badge to claim a locker, making the process simple and convenient for all users.

## Conclusion

By partnering with Keynius, the Flemish Government successfully transitioned to a modern, flexible, and sustainable smart locker system. The solution enhanced operational efficiency and aligned with the government's commitment to eco-friendly practices. This project stands as a testament to Keynius's ability to provide tailored, full-service solutions.

With a network of local partners, we leverage deep industry expertise to create custom solutions that meet any client's specific needs. Our ownership of the entire supply chain ensures we can successfully deliver high-quality, reliable systems that drive tangible results.
