Luggage Storage for More Time on the Island

LUGGAGE

PAY & STORE

 GREECE

LOC Mykonos provides luggage storage near the landmark windmills in Mykonos Town, alongside transfer and travel services. On one of Greece's best-known islands, summer brings a concentrated opportunity to serve international visitors between check-out and departure.

Capturing that demand means making storage available beyond staffed hours, with clear instructions for customers who speak different languages. For LOC, the operating priority is to let visitors store, pay, and collect independently, while staff remain available for support when needed.

Serving Mykonos's Summer Visitors

Concentrated seasonal demand

The summer peak calls for a repeatable rental process that serves visitors without staff handling every transaction.

International customers

Multilingual instructions let international visitors pay and access lockers without staff translating each step.

Access beyond staffed hours

Early arrivals and late departures create demand outside normal working hours, making continuous customer access an operating priority.

Staff time for support

Routine rentals need to work independently, leaving staff available when a customer needs extra assistance.

A SMARTER SOLUTION

Discovery

LOC's operating need is to serve seasonal visitors around the clock, without making every luggage drop-off or collection depend on onsite staff.

Solution & Recommendation

The installation combines Keynius smart lockers with a Smarty touchscreen terminal, a payment solution, and a QR code reader for self-service use.

Customization & Collaboration

Medium and large lockers, flexible rental periods, and multilingual guidance adapt the service to different luggage needs and international visitors.

Why Keynius

Keynius brings locker access and payment into one self-service journey, enabling LOC to offer 24/7 storage with staff providing support when needed.

The Results: Self-Service Storage Around the Clock

LOC can serve customers 24/7 without continuous onsite staffing. Routine rentals run through the terminal, payment solution, and QR reader, with staff available for support.

The Smarty touchscreen, payments, and QR access let customers complete routine rentals without onsite staff.

24/7 self-service access keeps luggage storage available beyond staffed hours, including early arrivals and late departures.

Multilingual guidance lets international customers use the service independently, with staff available when needed.

Staff can focus on support when needed, while the self-service installation handles everyday storage access and payments.

Conclusion

LOC Mykonos can now serve customers 24/7 without continuous onsite staffing. Keynius's Smarty touchscreen, payment solution, and QR code reader let visitors complete routine rentals independently, supported by multilingual guidance.

The implementation helps LOC meet summer demand while keeping staff available for support when needed. Everyday storage access and payments continue without requiring an employee to handle each rental.
