

Smart Luggage Lockers

Smart luggage lockers that keep belongings protected, reduce staff involvement, and create a smoother traveler experience.

Built for Luggage, Ready for Any Location

Not every locker is designed for rolling suitcases, backpacks, and oversized travel bags. Until now...

Keynius now offers a dedicated line of luggage lockers developed specifically around real baggage dimensions.

Our luggage locker range includes preset configurations for small, medium, and large-sized luggage, making it easier to match capacity to expected demand and launch with a proven setup.

Whether you operate a hotel, hostel, station, public venue, or dedicated luggage storage center, Keynius helps you offer secure self-service storage while maintaining central control through one cloud-based platform.

Indoor and outdoor models are available, so the same solution can be deployed in lobbies, shared spaces, exterior access points, and high-traffic public environments.

 **Calculate Your ROI**

Outdoor | Extended

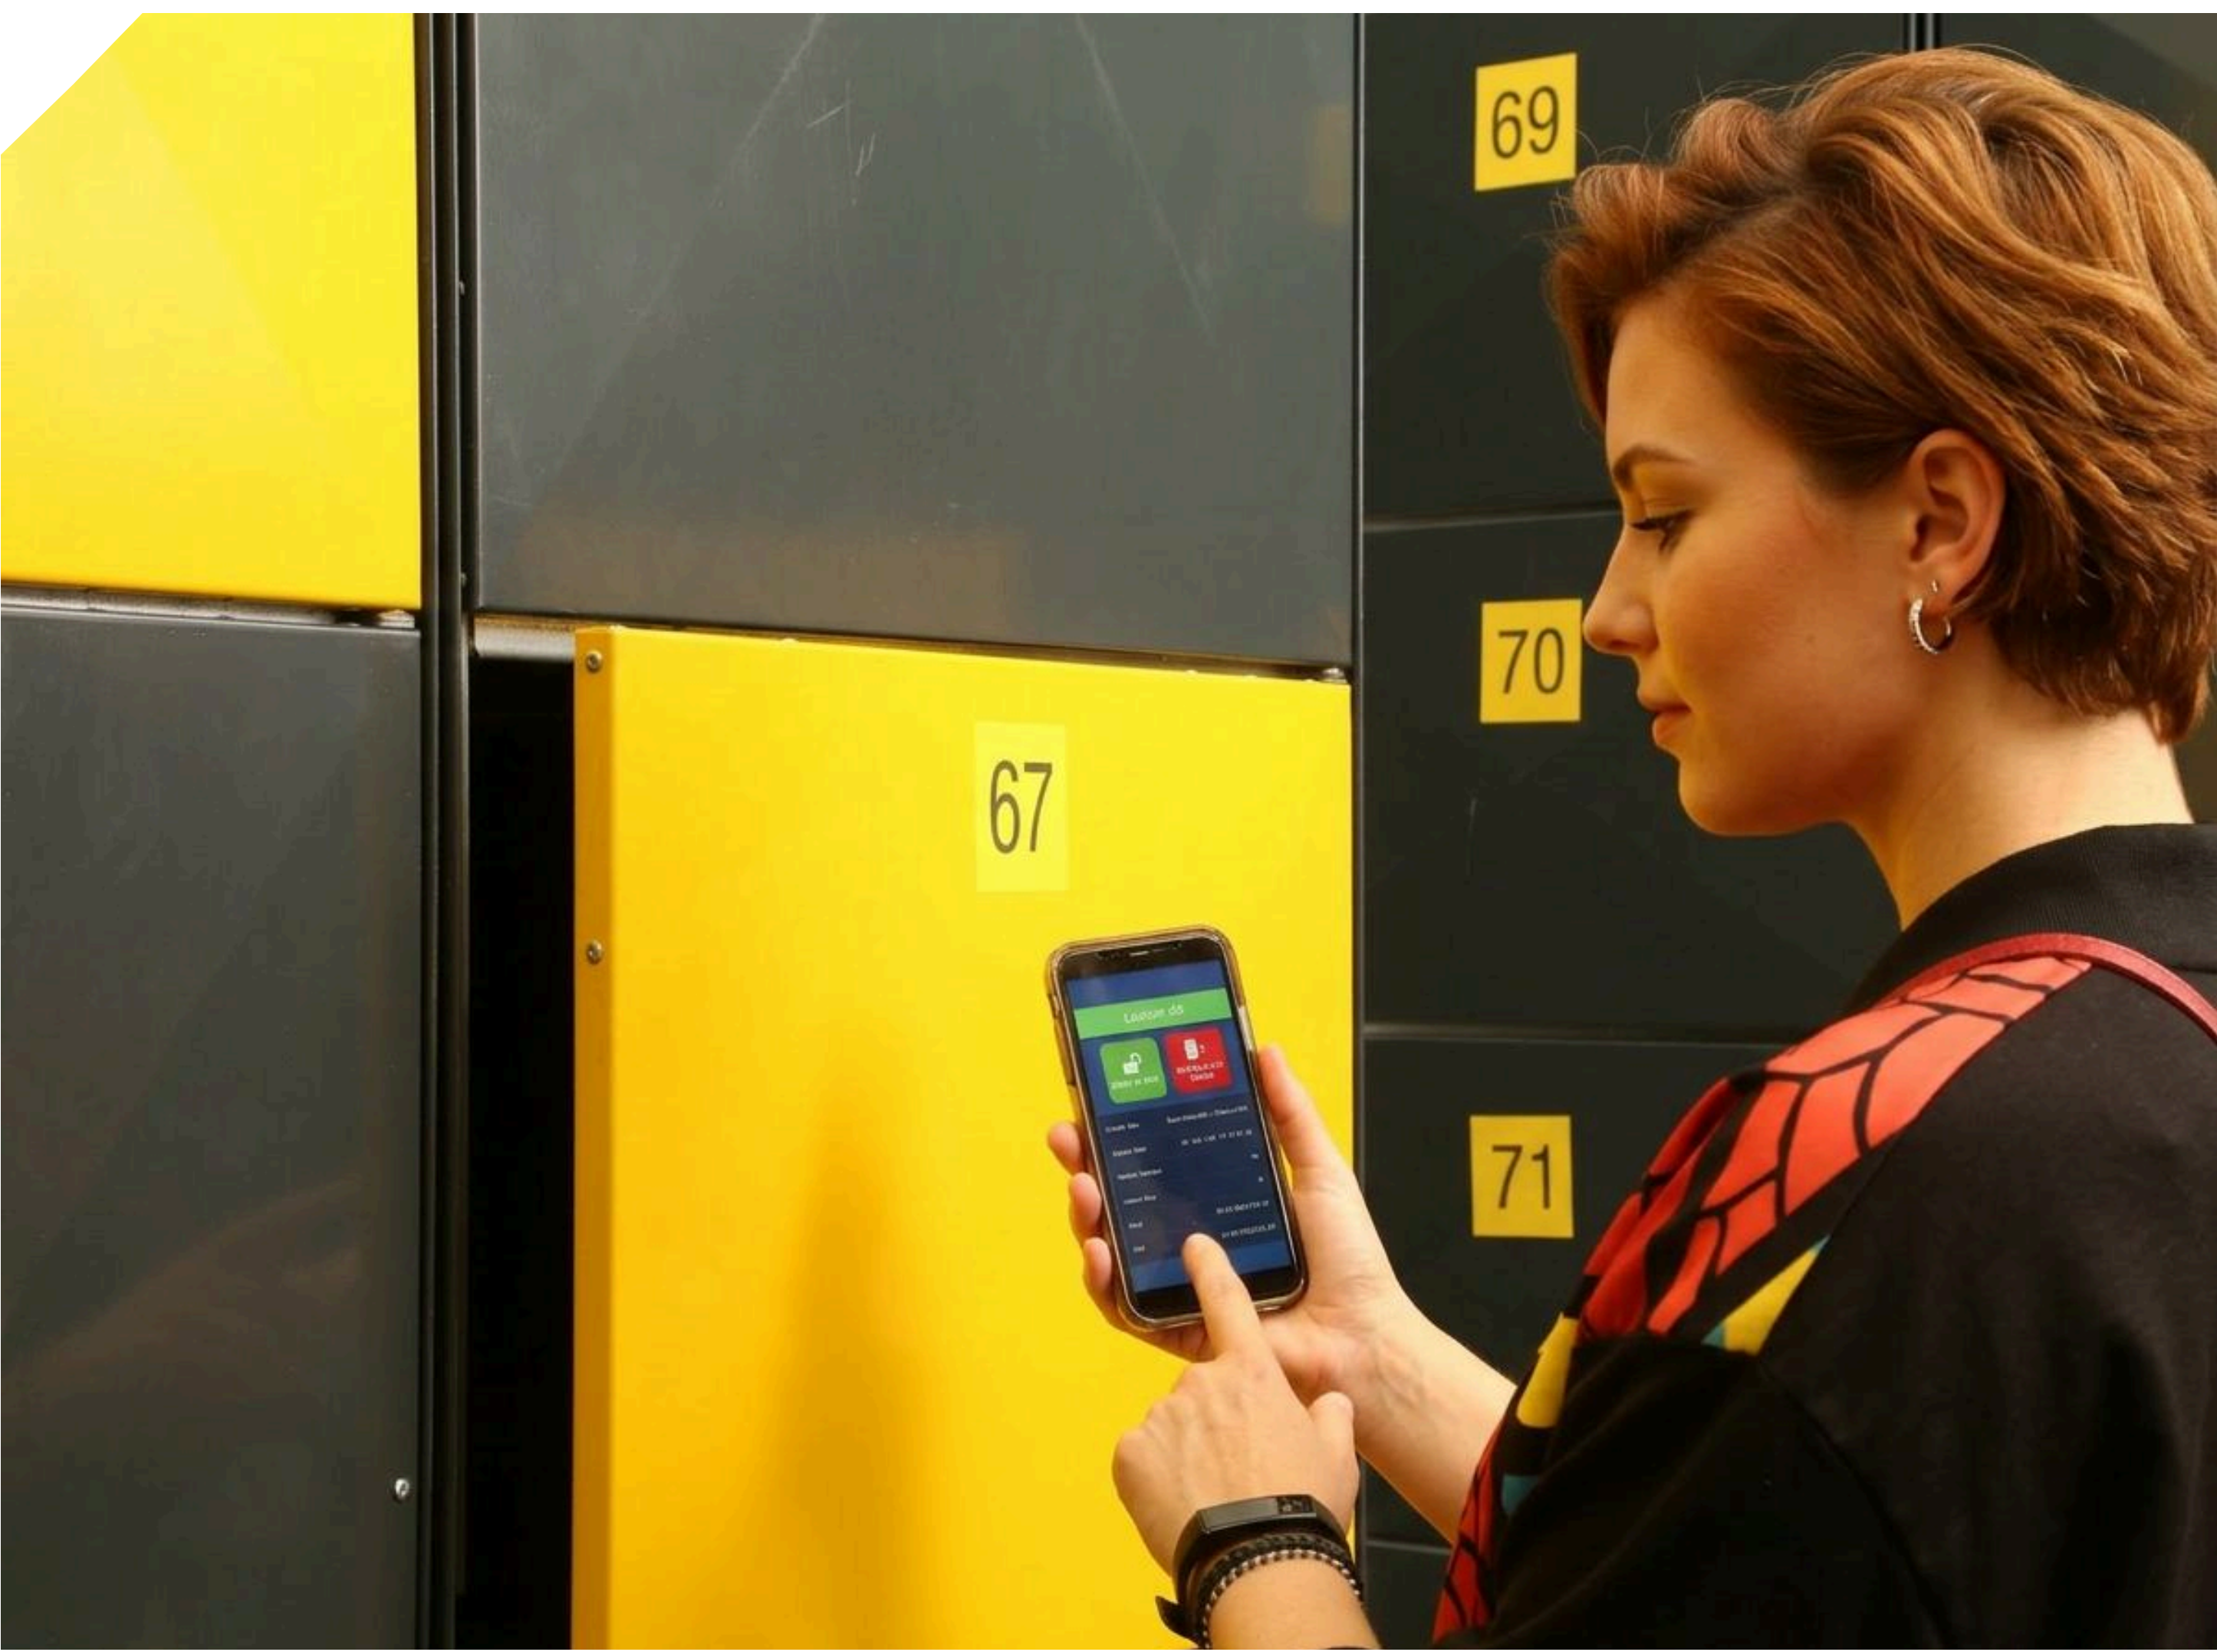

Accessories
Smarty Screen 8”

Payment Terminal PIN & Contactless

Self-Service Luggage Storage 24/7

Allow guests and travelers to store and retrieve luggage independently before arrival, after departure, or between connections without staffed handovers.

 QR, PIN & Contactless Access

Support a fast, intuitive user journey with secure access methods that reduce friction on site.

 Indoor & Outdoor Locker Models

Deploy the same platform inside terminals, lobbies, and shared spaces where round-the-clock access matters most.

 Generate Revenue & Insights

Self-serve Smart Luggage Lockers provide a great ROI while also allowing you to better allocate staff.

Designed Around Real Bag Sizes

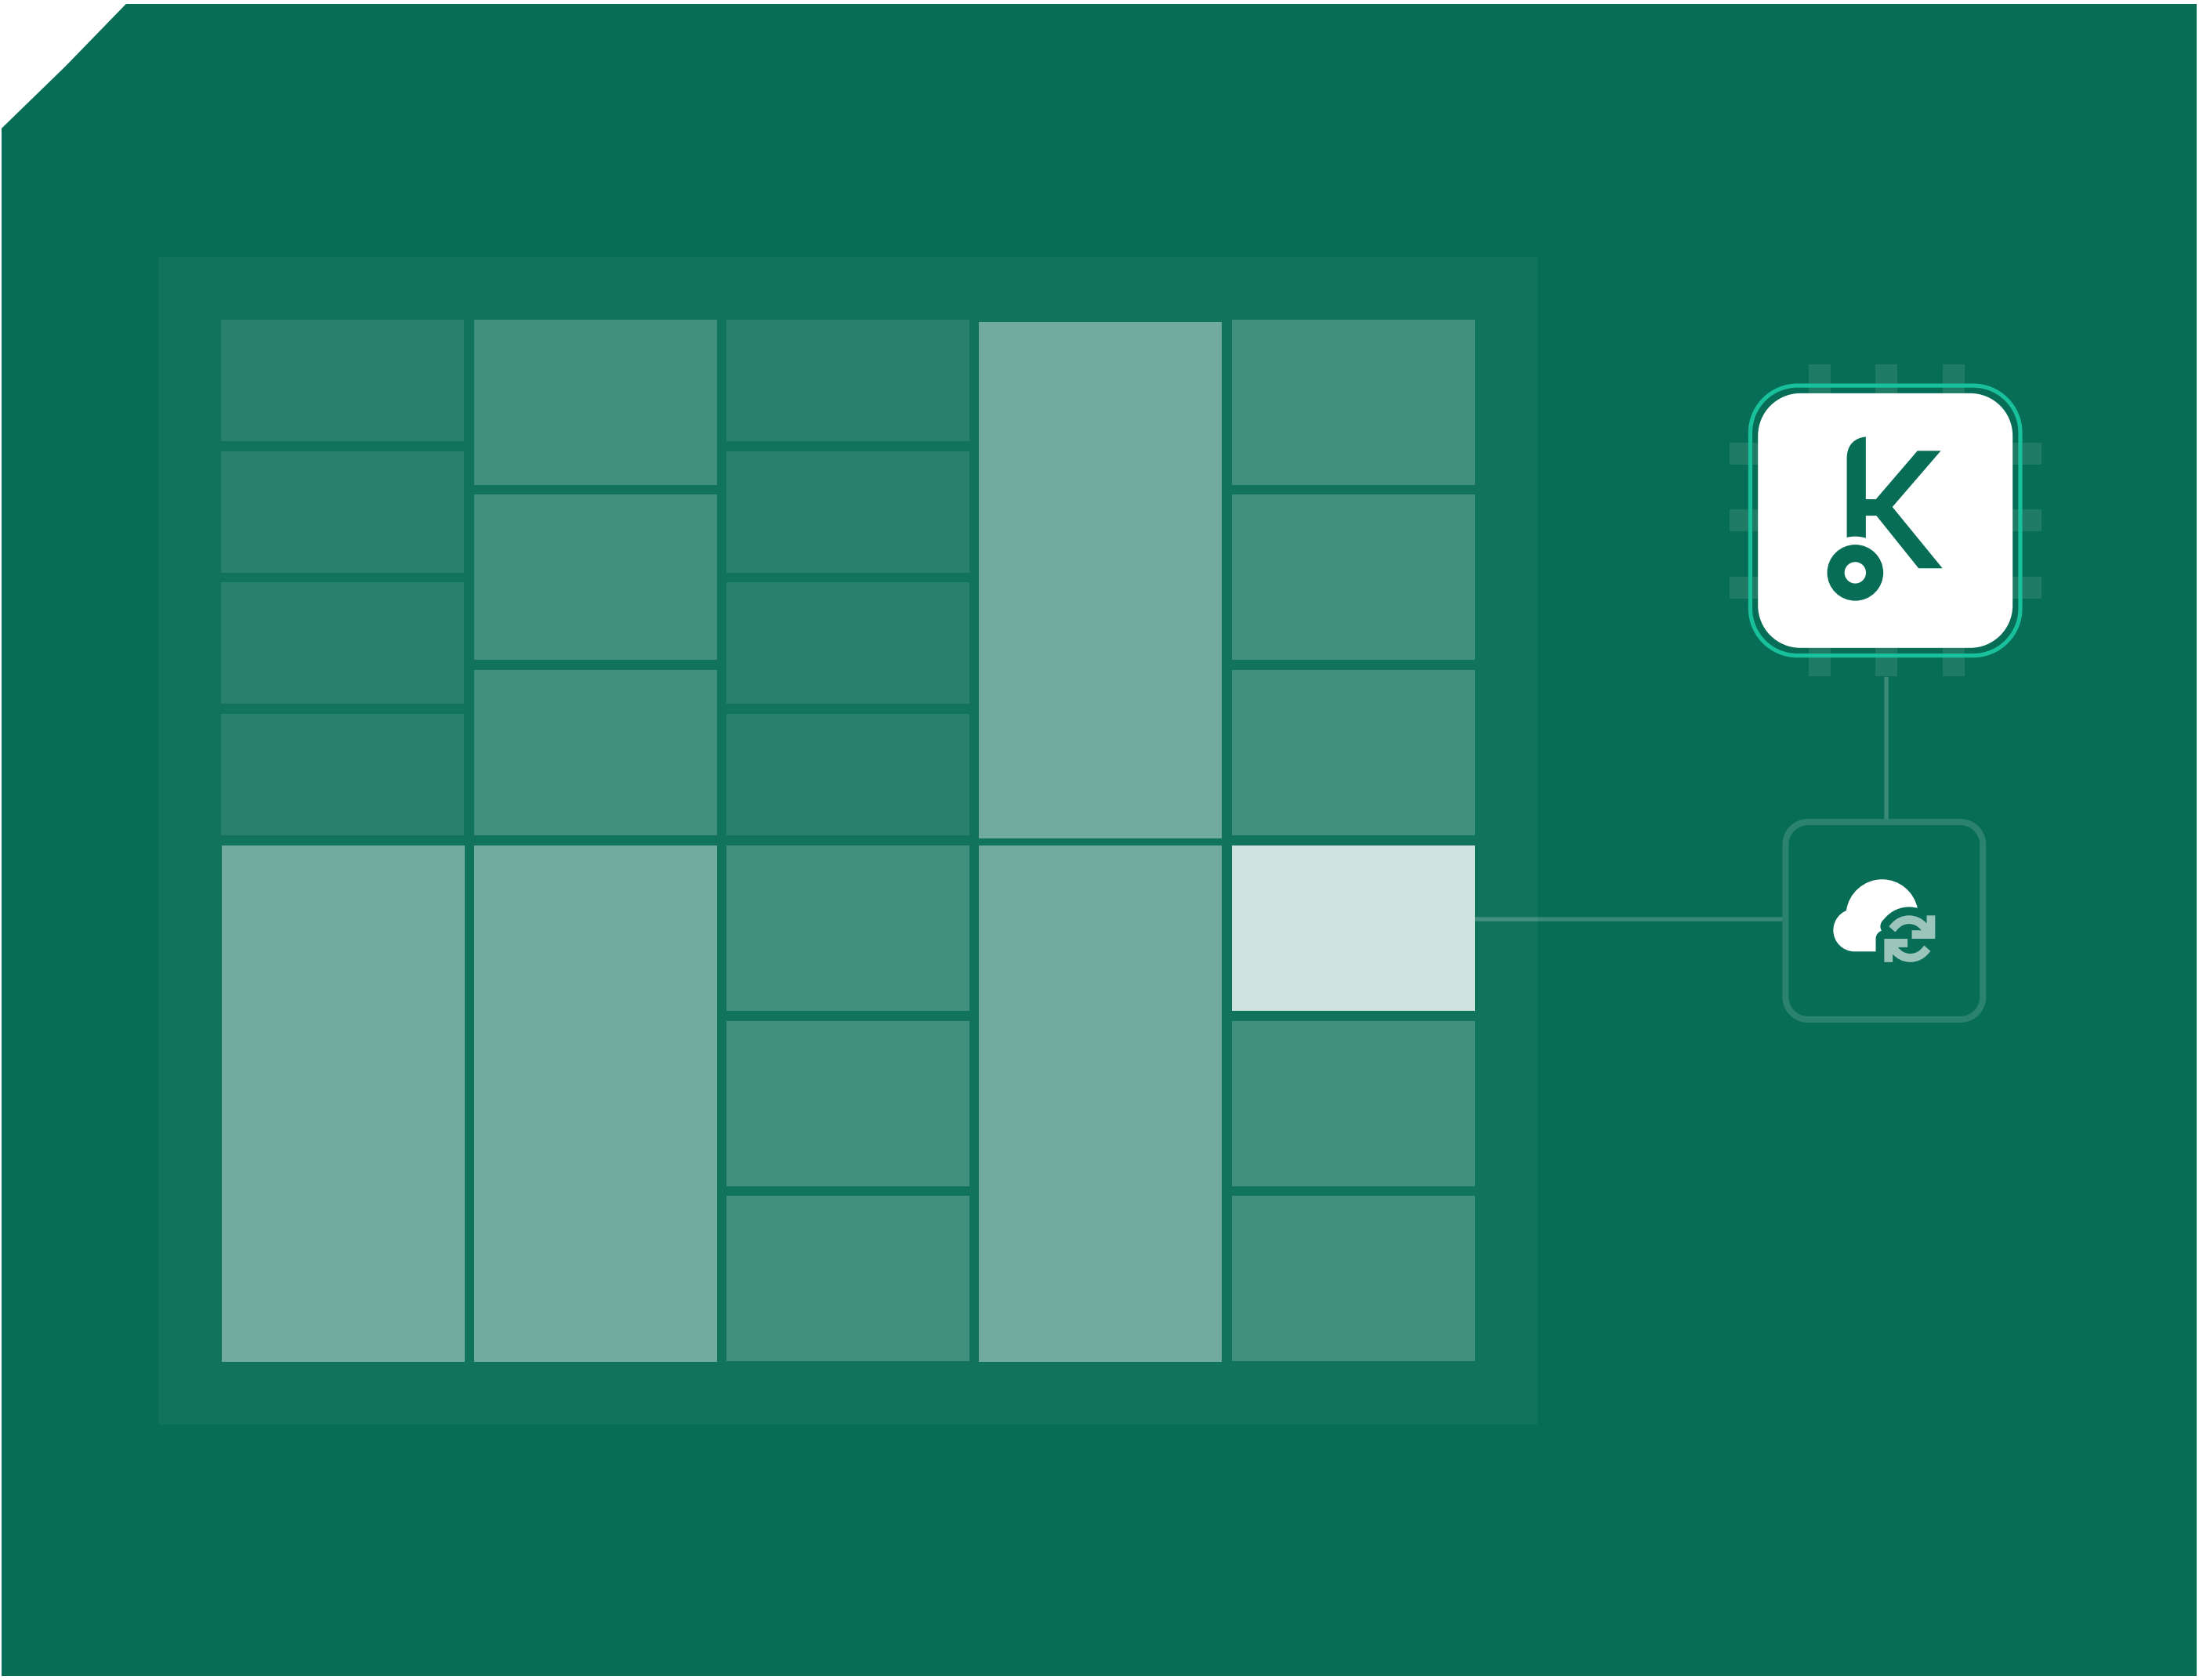

Keynius luggage lockers are purpose-built for baggage storage rather than generic item storage. That means a better fit for carry-ons, backpacks, medium suitcases, and large luggage.

 Preset Small, Medium & Large Compartments

- Small:  or 
- Medium:   or  
- Large:   or    

 Cloud-Based Management & Paid Mode

Track locker status and availability centrally, and turn storage into a revenue-generating service when needed.

Multiple Workflows Available

Choose between using our in-locker Smarty terminal, a web-based application, or a hybrid of both.

 Smarty Terminal

Installed directly into the locker wall, the Smarty makes it easy for guests and admins to manage a locker on-site.

 Web App

Our web app allows guests to reserve lockers online in advance and access their locker directly from their phone.
