

Discover the best smart locking solutions for

Fitness & Sports.

- Maximize your member experience
- Multiple ways of locker operation
- Manage all lockers remotely

The future of fitness lockers is here.

Imagine: every member always has a locker easily and quickly at their disposal in which they can safely store their belongings, without any staff interference, lost keys or coin issues. They simply operate the locker via their smart-phone, Fitness club card or tag, or terminal, and can even reserve lockers in advance. Using some of the lockers for dispense functions, such as rental of sports goods, is also easily done. For administrators, locker management is now a piece of cake: simply via their phone or a PC, where lockers can be operated individually, multiple or all at once, or set up for automatic processing. System admins are happy too: no more need to install and maintain software and servers.

Why is Keynius the best solution for your club locker rooms?

1 Use locker walls in the most efficient way.

- Let guests reserve (and even pay for) lockers in advance or locally.
- Let guests use lockers via club card, pincode, QR code scan or App.
- Save on precious floor area
- Simple QR code scanning, fill in e-mail address, claim, (pay) and enjoy!
- Very good return on investment

2 Multiple usage modes: Choose the best way(s) to configure and operate your lockers.

Keynius Locker configurations

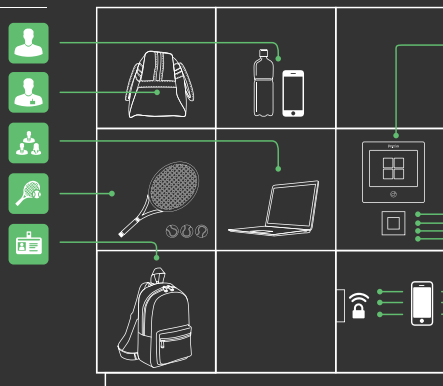

Member (fixed) Locker

Guest day Locker

3 Developed as one system: Matching hard- and software.

- Ultra-flexible and expandable
- Unique lock that can serve as both push2open and pop2open
- Enhance locker cabinets with features such as USB-A & USB-C power connection, cabinet and/or door lights, RFID and more
- Cloud operated: safe, secure, automatically updated, no servers needed
- 3rd party software system integration (API)

USE CASE Health Club Jordaan (NL).

Health club Jordaan is a large fitness club in the Western part of Amsterdam. Recently they changed all lockers for smart lockers with Keynius control. Members can reserve their locker in advance via the website or claim a locker locally via the Smarty touch screen. As the Health Club maintains a smartphone-free policy in sport and yoga areas, guests/members can choose a pincode to operate their locker. At the end of the day, the 'open-all' function makes checking and cleaning an easy job.
