Why is Keynius the best solution for your office?

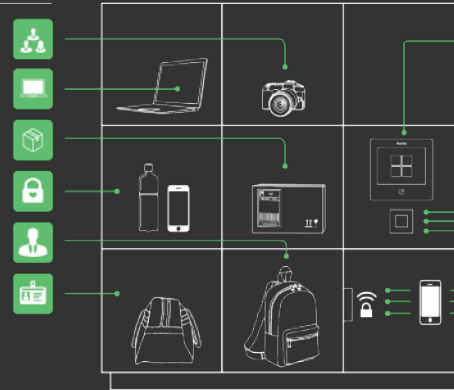

1 Use locker walls in the most efficient way.

- Multiple functions can be united in one locker wall: Storage, click & collect, parcel, vending, IT & asset and visitor
- Monitor locker use real time for optimal usage
- Save on precious floor area
- Save on subscription fees for unused lockers

2 Multiple usage modes: Choose the best way(s) to configure and operate your lockers.

Keynius Locker configurations

- Team Locker
- IT & Asset Locker
- Click & Collect Locker
- Personal Locker
- Visitor Locker
- Employee Day Locker

Keynius smart locking control

- Touch screen (Smarty)
- QR/Barcode
- Fingerprint
- Key card (RFID/NFC)
- App (Mobile/Tablet)
- Online (Mobile/Tablet)

3 Developed as one system: Matching hard- and software.

- Ultra-flexible and expandable
- Unique lock that can serve as both push2open and pop2open
- Cloud operated: safe, secure, automatically updated, no servers needed
- 3rd party software system integration (API)
- Enhance locker cabinets with features such as USB 1.0/3.0 power connection, cabinet and/or door lights, RFID and more

USE CASE International IT Consultancy firm, London.

Recently Keynius has been installed in 528 lockers in a London office of a large IT Consultancy multinational.

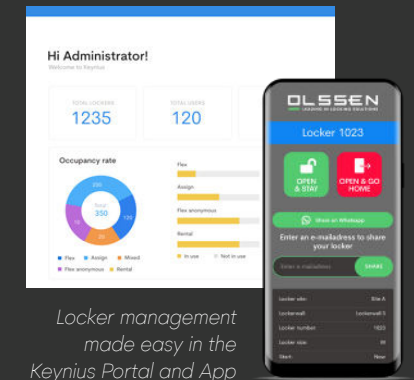

The lockers can be operated with the company key card on the door, App and touch screen. They will serve multiple purposes for employees, guests and facility management.

Smart locking reinvented.

Keynius is the global new standard in possibilities for 'anything with a lock'. We invent and sustainably develop smart, innovative and high-tech solutions that are easy to operate and fun to use, to help companies become more profitable, help employees make their jobs easier, and help users to keep what is precious safe.
