

Discover the best smart locking solution for

Pharmacy.

- 24/7 service to customers
- Reduce operating expenses
- 3rd party integration with door access control or pharmacy information systems

The future of medicine dispense is here.

Provide 24/7 service to your customers with Pharmacy lockers. Handy, safe and reliable.

With connecting door access software or pharmaceutical software to our intuitive locker-system a flawless customer journey is guaranteed. Clients receive notifications automatically which enables them to open the entrance door and locker by using a QR or PIN code.

There is also an option to pay cashless for e.g. non-prescription medicines. During the day, the lockers can also serve as cloakroom for visitors and/or personnel. Flexible!
